

Professional Services for Mission Critical Equipment

Global ARFF Services understands that ARFF operations directly impact the airport's ability to operate as well as fight fires and respond to other emergencies. Our mission is to keep you in service! Our service technicians hold ASE and EVT certifications as well as specialized certifications from major manufacturers. We're the world's most knowledgeable resource for ARFF equipment.

INSPECTIONS & PREVENTIVE MAINTENANCE

Preventive maintenance is an attitude, a commitment. It means being constantly on the lookout for things that might go wrong. We know what to look for. We identify and prevent issues before they become problems. Our preventive maintenance and inspections program brings vehicles in on a routine schedule, resulting in less down-time and lower repair costs. And, we provide full inspection and maintenance documentation that FAA inspectors want to see.

SNOZZLE®

We are the most experienced team of Snozzle technicians in the industry! Our service team performs inspections, maintenance, upgrades, and repairs to all models of Snozzle to ensure your equipment is operating at peak performance. Let us upgrade your Snozzle to the latest technology.

- Auto & manual modes for greater control
- Computer managed boom and truck protection
- Emergency overrides delivers more flexibility
- Driving with boom up alerting
- Short Training Times

TRAINING

We offer operator and maintenance training on every brand of ARFF equipment; customized to meet your specific needs. Our training programs cover orientation, familiarization, inspections, maintenance and operations in both lecture and hands-on settings. Our popular courses include:

- Engines
- Chassis Electrical (Hard Wired & Multi-Plex)
- Water Systems (Pumps, Plumbing, Valves)
- Foam, Halon, and Dry Chem Systems
- Air Systems and Air Brakes, ESC, ABS
- Preventive Maintenance and Inspections
- Snozzle®
- Advanced Aerial & Aerial Maintenance
- FLIR and Thermal Imaging Cameras

- Minor to Major Repairs
- Foam & Pump Testing
- Dry Chemical & Clean Agent System Testing
 - Bumper to Bumper Service
- Elevated Waterway Repairs & Upgrades
 - Color Camera, FLIR & DVR Systems

ATTACKMASTER 3,4

Global ARFF Services is proud to offer the **Attackmaster 3** and **4**, Elevated Waterway Control Systems. This innovative system is built with parts that will not become obsolete for at least 10 years, and installation is simple leaving the working, reliable parts of your system unchanged. The change over is very easy, resulting in a quick learn time for operators. The operation of the nozzle and the discharge system are unchanged.

Attackmaster 4 has all the features of the Attackmaster 3 plus it uses single joystick technology and computerized touch screen controls.

ACT II™

Attackmaster Camera Technology Thermal Imaging System uses FLIR System Inc., PathfinderIR II. PathfinderIR II is a powerful thermal night vision camera with animal and pedestrian detection that lets you see clearly in total darkness, regardless of the vehicle you're driving or the road you're on. There are over 50,000 in-field, in use with proven reliability.

Wiring included to meet your needs. Direct plug & play for most **Snozzle™** & **Rhino™** systems. Custom cables are available.

Complete, pan and tilt systems also available. Don't sacrifice clarity for color you probably won't use. Most FLIR is used for night driving or person locating.

We also install Color Cameras and Back-Up Camera systems.
